

## List of Contents

### NUMBER 1

Terry E. Shoup	i	Happy Birthday <i>Mechanism and Machine Theory</i> and Happy Birthday IFToMM
G. Bianchi and L. Püst	ii	Twenty years of IFToMM
	v	Obituary
C. G. Gibson and K. H. Hunt	1	Geometry of screw systems—1. Screws: genesis and geometry
C. G. Gibson and K. H. Hunt	11	Geometry of screw systems—2. Classification of screw systems
R. Karmakar and A. Mukherjee	29	Dynamics of electric overhead travelling cranes. A bond graph approach
J. P. Sadler and Zhijia Yang	41	Optimal design of cam-linkage mechanisms for dynamic-force characteristics
M. N. Ambardekar and K. N. Gupta	59	Stochastic optimal control of vibrations of a high-speed cam-driven mechanism
J. M. Castelain and D. Bernier	69	A new program based on the hypercomplex theory for automatic generation of the direct differential model of robot manipulators
Youngil Youm and T. C. Huang	85	Exact displacement analysis of XCCC spatial mechanisms by the direction cosine matrix method
Ralph Akhras and Jorge Angeles	97	Unconstrained nonlinear least-square optimization of planar linkages for rigid-body guidance
J. N. Bricout, J. C. Debus and P. Micheau	119	A finite element model for the dynamics of flexible manipulators
<i>Buchbesprechung (Book Review)</i> H. Gläser	129	Theorie Technischer Systeme. Eine vollständige Theorie für die technische Konstruktion (Theory of Technical Systems. A Total Concept Theory for Engineering Design). Von V. Hubka und W. E. Eder
<i>Software Survey Section</i>	I	

### NUMBER 2

Osman Gürsoy	131	The dual angle of pitch of a closed ruled surface
George N. Sandor, Yongxian Xu and Tzu-Chen Weng	141	A graphical method for solving the Euler-Savary equation

S. N. Kolpashnikov and I. B. Chelpanov	149	Calculation and design principles of high-speed robot grippers
Rafael Kelly	161	Adaptive computed torque plus compensation control for robot manipulators
H. B. Wang and Z. Huang	167	Kinematic influence coefficient method of kinematic and dynamic analysis
Johann Lang	175	Über Charakteristiktangenten von Hüllflächen
Gao Feng	183	Complete shaking force and shaking moment balancing of 26 types of four-, five- and six-bar linkages with prismatic pairs
A. Cardona and M. Geradin	193	Modeling of a hydraulic actuator in flexible machine dynamics simulation
S. Nagarajan and David A. Turcic	209	General methods of determining stability and critical speeds for elastic mechanism systems
A. Daadbin	225	Static and dynamic analysis of knuckle shape threaded joints
J. Rastegar and B. Fardanesh	233	Manipulator workspace analysis using the Monte Carlo method
<i>Book Review</i> H. Gründemann	241	Transforming Domain into Boundary Integrals in BEM, Lecture Notes in Engineering, Vol. 35. By W. Tang
<i>Software Survey Section</i>	I	
<i>New Patents</i>	V	

### NUMBER 3

## **DESIGN THEORIES: APPLICATIONS TO MECHANISM AND MACHINE DESIGN**

Kurt M. Marshek and Srikanth M. Kannapan	v	Preface
M. S. Hundal	243	A systematic method for developing function structures, solutions and concept variants
Eric Sandgren	257	A multi-objective design tree approach for the optimization of mechanisms
Farrokh Mistree, Douglas Muster, Sridharan Srinivasan and Sangram Mudali	273	Design of linkages: a conceptual exercise in designing for concept

<b>Pramod Jain and Alice M. Agogino</b>	287	Theory of design: an optimization perspective
<b>Kristin L. Wood and Erik K. Antonsson</b>	305	Modeling imprecision and uncertainty in preliminary engineering design
<b>Koichi Kurumatani, Tetsuo Tomiyama and Hiroyuki Yoshikawa</b>	325	Qualitative representation of machine behaviors for intelligent CAD systems
<b>Srikanth M. Kannapan and Kurt M. Marshek</b>	335	An algebraic and predicate logic approach to representation and reasoning in machine design
<b>Atsushi Nakamura and Naomasa Nakajima</b>	355	Computer-aided design diagnosis for machines—kinematic model extraction from mechanisms
<b>Mark R. Cutkosky and Jay M. Tenenbaum</b>	365	A methodology and computational framework for concurrent product and process design
<b>Michael R. Duffey and John R. Dixon</b>	383	A program of research in mechanical design: computer-based models and representations
<i>Software Survey Section</i>	I	

#### NUMBER 4

<b>Jürgen Jakobý</b>	i	Professor Dr-Ing. Franz Josef Gierse, 60 Jahre
<b>Jürgen Jakobý</b>	397	Ikonische Darstellung von Mechanismen und Getrieben
<b>Milan D. Djurovic and Miomir K. Vukobratovic</b>	407	A contribution to dynamic modeling of cooperative manipulation
<b>Wen Yeuan Chung and C. H. Chiang</b>	417	Fourth-order synthesis of Watt-II six-bar function generators
<b>A. J. Koivo and M. A. Unseren</b>	427	Modeling closed chain motion of two manipulators holding a rigid object
<b>T. S. Liu and S. Y. Tsay</b>	439	Singularity of robotic kinematics: a differential motion approach
<b>A. I. Dobrolyubov</b>	449	Stepping wave mechanisms
<b>I. S. Kochev</b>	459	Full shaking moment balancing of planar linkages by a prescribed input speed fluctuation
<b>I. S. Kochev</b>	467	Theory of symmetrical mechanisms
<i>Software Survey Section</i>	I	
<i>New Patents</i>	V	

## NUMBER 5

<b>Asen Yotov Daskalov</b>	479	Kinematic analysis of cardan drives
<b>D. C. H. Yang and J. G. Blanche</b>	487	Design and application guidelines for cycloid drives with machining tolerances
<b>V. S. Karelin</b>	503	The asymmetry of the $3R$ plane structural group and its containing mechanisms
<b>G. Stépán, A. Steven and L. Maunder</b>	515	Design principles of digitally controlled robots
<b>James K. Mills</b>	529	Stability and robustness of a high gain nonlinear robot manipulator controller
<b>Bogdan Posiadala, Bogdan Skalmierski and Lech Towski</b>	547	Motion of the lifted load brought by a kinematic forcing of the crane telescopic boom
<b>Zhonghe Ye and M. R. Smith</b>	557	A new equation for the critical frame length in the three-gear drive
<b>Jae Uk Kim and Byung Man Kwak</b>	563	Application of edge permutation group to structural synthesis of epicyclic gear trains
<b>Ming J. Tsai and Yee H. Chiou</b>	575	Manipulability of manipulators
<i>Book Reviews</i> <b>Z. S. Roth</b>	587	Machines that Walk: The Adaptive Suspension Vehicle. By Shin-Min Song and Kenneth J. Waldron
<b>Aynur Ünal</b>	587	Vibration Diagnostics in Precision Instruments. By S. Korablev, V. Shapin and Y. Filatov
<b>H. Gläser</b>	588	Gelenke und Gelenkwellen. Von F. Schmelz, H.-Ch. v. Scherr-Thon und E. Aucktor
<i>Software Survey Section</i>	I	
<i>New Patents</i>	V	

## NUMBER 6

### i Obituary

<b>K. S. H. Sadek, J. L. Lloyd and M. R. Smith</b>	589	A new design of Geneva drive to reduce shock loading
<b>Jarosław Stryczek</b>	597	Projektieren der Zykloidenverzahnungen hydraulischer Verdrängermaschinen
<b>Carlo Innocenti and Vincenzo Parenti-Castelli</b>	611	Direct position analysis of the Stewart platform mechanism

<b>C. A. Rogers, H. H. Mabie and C. F. Reinholtz</b>	<b>623</b>	<b>Design of spur gears generated with pinion cutters</b>
<b>H. H. Mabie, C. A. Rogers and C. F. Reinholtz</b>	<b>635</b>	<b>Design of nonstandard spur gears cut by a hob</b>
<b>Li Shujun</b>	<b>645</b>	<b>Computer-aided structure synthesis of spatial kinematic chains</b>
<b>B. Heimann and H. Loose</b>	<b>655</b>	<b>Treatment of kinematic constraints of multirigid body system dynamics and their application to manipulation-robots</b>
<b>Hyunsoo Kim and Kurt M. Marshek</b>	<b>667</b>	<b>Force distribution for a flat belt drive with a concentrated contact load</b>
<b>I. S. Kochev</b>	<b>679</b>	<b>General method for active balancing of combined shaking moment and torque fluctuations in planar linkages</b>
<b>J. A. Parkin</b>	<b>689</b>	<b>Co-ordinate transformations of screws with applications to screw systems and finite twists</b>
<i>Software Survey Section</i>	<b>I</b>	
<i>New Patents</i>	<b>V</b>
